Gary,

I would appreciate a coordination call. I need to discuss the deployment period. We would like a bit of flexibility, if possible, as we have EPA Diver Training scheduled for May 2-6. I have an exercise running most of tomorrow but I can step out for a call. I'm free all day Thursday as well.

Thanks Gary – Please let me know if you would like to have a coordination call with your folks. Otherwise, just let us know the dive team schedule and we will get things in order for their support.

Regards,
David

Will do. I've already discussed this with the dive team, so they are planning to do the inspection before placing the samplers. We should coordinate on the exact dates.

Thanks,

Gary Miller

Subject: San Jacinto Dive Inspection and Pore Water Sampler Installation

Gary – As we discussed last week, We are planning on installing the armored cap porewater samplers at San Jacinto the week of April 4th. I understand the EPA dive team will be taking the lead on performing the rest of the dive inspection of the site and installing the samplers. We want to make sure the cap is not disturbed to the maximum extent practical after the pore water samplers are installed, so we would like to make sure the dive team has completed their inspection work prior to the sampler installation. Can you please work with the dive team to get final dates for their inspection and the pore water sampler installation? I will do the appropriate coordination for the inspection and sampling for dive team support with our internal staff and with Benchmark Ecological Services after I hear back from you.

Thanks,
David
